## Hair Texture

### How did we calculate your result?

We asked an expert in the beauty industry to review your answers to the hair texture questionnaire. The results were then analyzed to determine your hair texture.

### More about hair texture

- **What is your hair texture?**
  - Normal: This is the most common type of hair, characterized by its smoothness and the way it waves or curls.
  - Dry: This type of hair lacks natural oil and is prone to breakage easily.
  - Fine: Hair that is thin and light is more likely to be fine.
  - Curly: This type of hair curls and waves naturally.
  - Frizzy: Hair with a lot of flyaways, rough texture, and high porosity is likely to be frizzy.

### Scientific Details

We used one of two different methods to calculate your hair type: FHM or MTC. The results are based on the analysis of your hair's characteristics, such as its smoothness, porosity, and texture.

### About Your Hair Texture result

You have been classified as having **[Your Hair Type]**

### Table: Your Hair Type

<table>
<thead>
<tr>
<th>Hair Type</th>
<th>Percentage</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>50%</td>
<td>Smooth with slight wave or curl</td>
</tr>
<tr>
<td>Dry</td>
<td>20%</td>
<td>Lack of natural oil, breaks easily</td>
</tr>
<tr>
<td>Fine</td>
<td>15%</td>
<td>Thin and light, more likely to be fine</td>
</tr>
<tr>
<td>Curly</td>
<td>10%</td>
<td>Naturally waves or curls</td>
</tr>
<tr>
<td>Frizzy</td>
<td>5%</td>
<td>Lot of flyaways, rough texture, high porosity</td>
</tr>
</tbody>
</table>
