Photo Sensitive Reflex

How do we calculate your result?

We match your sun exposure in the morning to the amount of time you spend outside for the rest of the day to calculate your risk of skin cancer.

More about the photo sensitive reflex

The longer you are outside the more your risk increases.

Keep exploring your Tesla results.

You can increase your sun protection by using sun cream or a hat when you go outside.

Scientific Details

We use one of two different methods to calculate your test results.

About your Photo Sensitive Reflex result.

Your photo sensitive reflex test shows that you are at low risk of skin cancer.
