About dog allergy

What is dog allergy?

Dog allergies occur when immunosuppression generates a reaction in the immune system to allergens, resulting in symptoms such as sneezing, scratching, or wheezing. Symptoms can vary depending on the severity of the allergy, but commonly include sneezing, scratching, and breathing difficulties.

What about Hay Fever or Allergic Purr?

Certain dog breeds are more susceptible to Hay Fever or Allergic Purr, which is caused by airborne allergens. These allergens can cause symptoms such as sneezing, itching, and watery eyes. While Hay Fever or Allergic Purr may not be as severe as dog allergies, it's important to identify and manage.

How are dog allergies diagnosed?

If you have already been diagnosed with a dog allergy, your doctor may recommend further testing to determine the specific allergens causing the reaction. This typically involves skin-prick or blood tests.

The threshold of developing a dog allergy can differ from one dog to another. Many factors can influence this, including the dog's breed, age, and exposure to allergens.

This test can assess whether you have a dog allergy, your specific conditions, and the best way to treat it.

The report is based on a general guideline for the animal. However, your pet's health in mind when it comes to determining what to do with your dog.

How are the results used?

The method described above is a general approach designed to help you assess your pet's allergy status. However, understanding the condition is essential.

- People with a severe reaction with or without a history of anaphylaxis may require additional tests.
- These tests are not a substitute for medical advice, and it's important to consult a veterinarian before making any decisions.

The Quotient of developing a dog allergy can differ from one dog to another. Many factors can influence this, including the dog's breed, age, and exposure to allergens.

The report is based on a general guideline for the animal. However, your pet's health in mind when it comes to determining what to do with your dog.
